 - Moving objects with a multi-threaded GUI
- Studied sustainability in the Euro food system in Ghent, Belgium
 - Completed a 3 hour college course pertaining to biological engineering, soil and animal science, and economics

WORK HISTORY

CERNER

Software Intern // Fayetteville, AR // May 2020 to July 2020

- I spent my time as an intern at Cerner on the careaware-oauth team which consisted of me and two other engineers. Our team worked on recreating a more secure and modern solution for software that is currently in use by Cerner clients. The software in use was written in grails and groovy, but we worked to create the same functionality in Java. A lot of my work over the summer pertained to connecting to databases through JDBC transactions and creating RESTful API's.

TACOS 4 LIFE

Line Cook // Fayetteville, AR // June 2019 to August 2019 and January 2018 to April 2018

Line Cook // Little Rock, AR // February 2017 to August 2017

- My daily tasks at Tacos 4 Life included preparing food items according to company policy, portioning, cooking and adhering to waste control guidelines.
